

## ABOUT US

Nutrients for Life Canada (NFL Canada) is a national team of passionate educators working with teachers across Canada. We deliver curriculum-based programs in alignment with Canada's Sustainable Agriculture Strategy to engage teachers and students in contributing to solutions for sustainable agriculture and environmental stewardship.

## OUR PURPOSE

The foundation for achieving global food security lies with one's understanding of the importance of healthy soils and the role of nutrients to maximize the plant's potential. Our team of regional managers deliver learning programs across Canada: virtually, in schools, at conferences and in the field! We proudly organize and host AGmazing learning opportunities to connect educators and students with the agriculture industry and sustainable food production.

In 2022 NFL reached  
**2200+ teachers!**  
**148,300+ students!**

Leading the delivery of plant nutrient educational programming across Canada!

# NUTRIENTS FOR THE MIND

## PRIORITY LEARNING AREAS & OPPORTUNITES:

- Soil & Plant Health • 4R Nutrient Stewardship • Nutrients in Food Production • Climate Change & Water Quality

### IN SCHOOL LEARNING

On demand, downloadable resources for educators to engage students in the classroom, including programming and funding to establish on site Learning Gardens.

### INDUSTRY/FARM TOURS

Teachers and /or students engage in a one-day tour of local industry and farms to learn about agriculture, soil health and plant nutrients.

### TEACHER INSTITUTES

Teachers engage in a two-day institute addressing NFL Canada priority programs for inclusion into one's curriculum.

### STUDENT SUMMITS

Students engage in a two-day summit addressing Climate Smart Agriculture, 4R Nutrient Stewardship and building sustainable farm plans.
